TRAVELLING CIRCUS

EPISODE 82 - MARCH 25TH, 2026

Who are you?

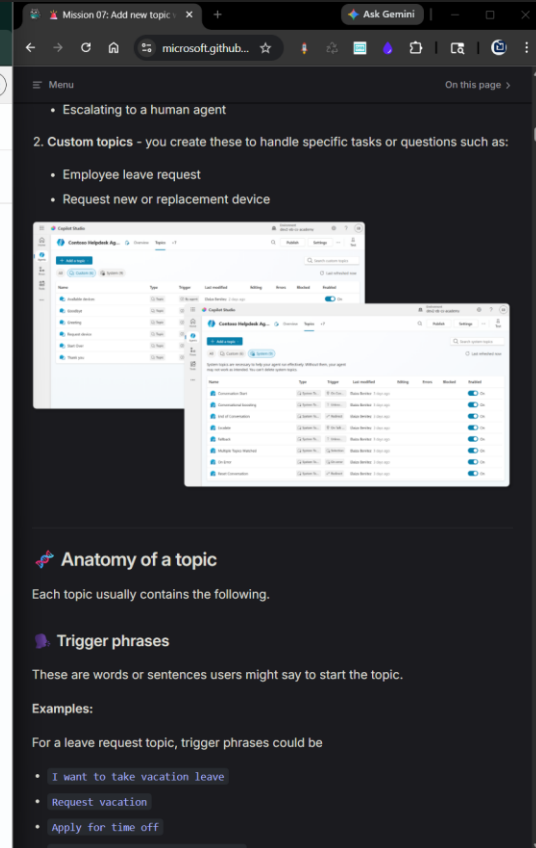

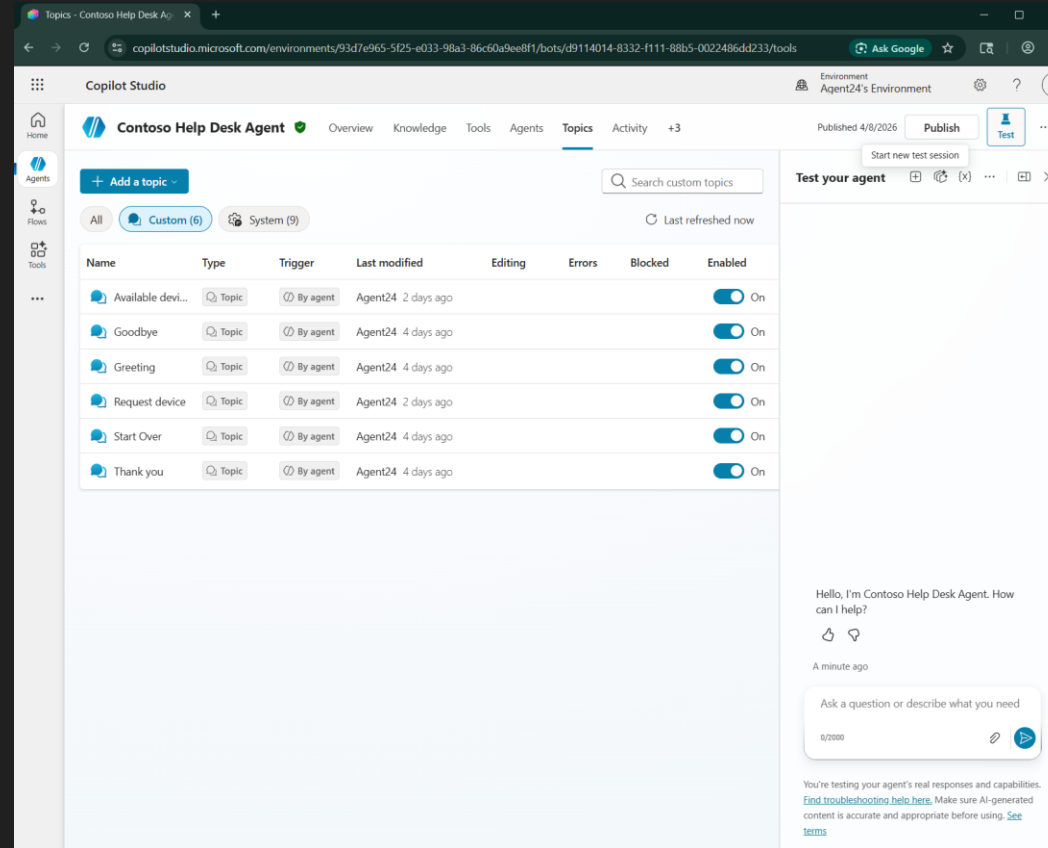

- What's your name?
- Where are you from?
- What is your background?
- What do you expect from today?

Housekeeping

- We have created sandbox environments for you!
- **Handout:** username, temp password, SharePoint site
- Install Authenticator app
- Setup a dedicated browser profile
- Environments will expire **May 1st**

Tips for labs

- Open Labs on phone or tablet or second screen
- Or use split screen in Windows

What is Agent Academy?

- **Microsoft's hands-on curriculum for building agents with Copilot Studio**
- Three tiers of training:
- **Recruit** → Operative → Commander
- Today we tackle Recruit: 13 lessons from zero to deployed agent

Who is this guy?

Meet BIT!

He will take us through the missions and lessons today!

He is also the mascot of the Agent Academy!

Agenda

- 09:00** Intro and foundations
- 10.00** Your first agent
- 10.40** **Build** (Declarative Agents, Solutions)
- 12.00** Lunch
- 13.00** **Enhance** (Topics, Cards and Flows)
- 14.20** **Deploy** (Event triggers and publishing)
- 15.20** **Complete** (Licensing and badge claim)
- 16.00** All done

Mission briefing

Mission #1: Your first agent

- Lesson 05: Your First Agent

www.color.cloud

nowledge as appropriate.

FRAGO (Fragmentary Order)

FRAGO communicates only what has
changed

— new tasks, updated objectives,
shifted timelines, or changed
conditions

Sometimes the UI has changed or the
tech has a glitch – we got you covered

Foundations

What Are Agents?

- **LLMs: the AI engine behind conversational agents**
- RAG: grounding responses in your organization's data
- Orchestration: coordinating knowledge, skills & actions

Autonomous vs. Declarative

- **Declarative Agents**

- You define the rules. The agent follows your prompts and instructions. Predictable, controlled, great for specific tasks.

- **Autonomous Agents**

- The agent decides how to act. It uses AI reasoning to choose actions, respond to events, and adapt. More powerful, less predictable.
- *Today we build both — starting simple, ending autonomous.*

Copilot Studio: The Building Blocks

- **Knowledge**

- What your agent knows — SharePoint, Dataverse, websites, files

- **Skills**

- What your agent can do — topics, flows, actions, connectors

- **Autonomy**

- How much your agent decides on its own — from scripted to fully autonomous

The Agent That Wasn't the Problem

- **A real-world story from the field**
- Sometimes the agent works perfectly — and the problem is somewhere else entirely.
- The lesson: understand the problem before building the solution.

Your Environment is Ready

- **No setup needed — we've done it for you**
- SharePoint sites, users, and lists are pre-provisioned
- Copilot Studio environments are ready to go
- Access details will be shared now — log in and verify

What we have done for you

Mission 00: Course Setup

 CODENAME	OPERATION DEPLOYMENT READY
 DIFFICULTY	★ ★ ★
 TIME	30 min
 PRODUCTS	Microsoft Copilot Studio SharePoint Microsoft 365
 TAGS	Environment Setup
 INDUSTRIES	IT

Objectives

Your mission includes:

1. Getting a Microsoft 365 account
2. Gaining access to Microsoft Copilot Studio
3. (Optional) Securing a Microsoft 365 Copilot license for production publishing
4. Creating a developer environment as your Copilot Studio environment to build in
5. Creating a SharePoint site to serve as your data source in later missions

Setup you need to do

- User Credentials
- Browser profile
- Make sure you can access SharePoint site
- Make sure you can access Power Apps Developer environment
- Make sure you can access Copilot Studio

Mission #1: Your first agent

Lesson 05: Your First Agent

- **Use a prebuilt template to get your first agent running**
- Browse the template gallery in Copilot Studio
- Pick a template, customize it, and test it
- Your first win of the day

Lesson 05: Step by Step

- **1. Open Copilot Studio**

- Navigate to your environment and select “Create”

- **2. Browse Templates**

- Explore the prebuilt agent gallery and pick one

- **3. Customize**

- Adjust the agent name, greeting, and behavior

- **4. Test**

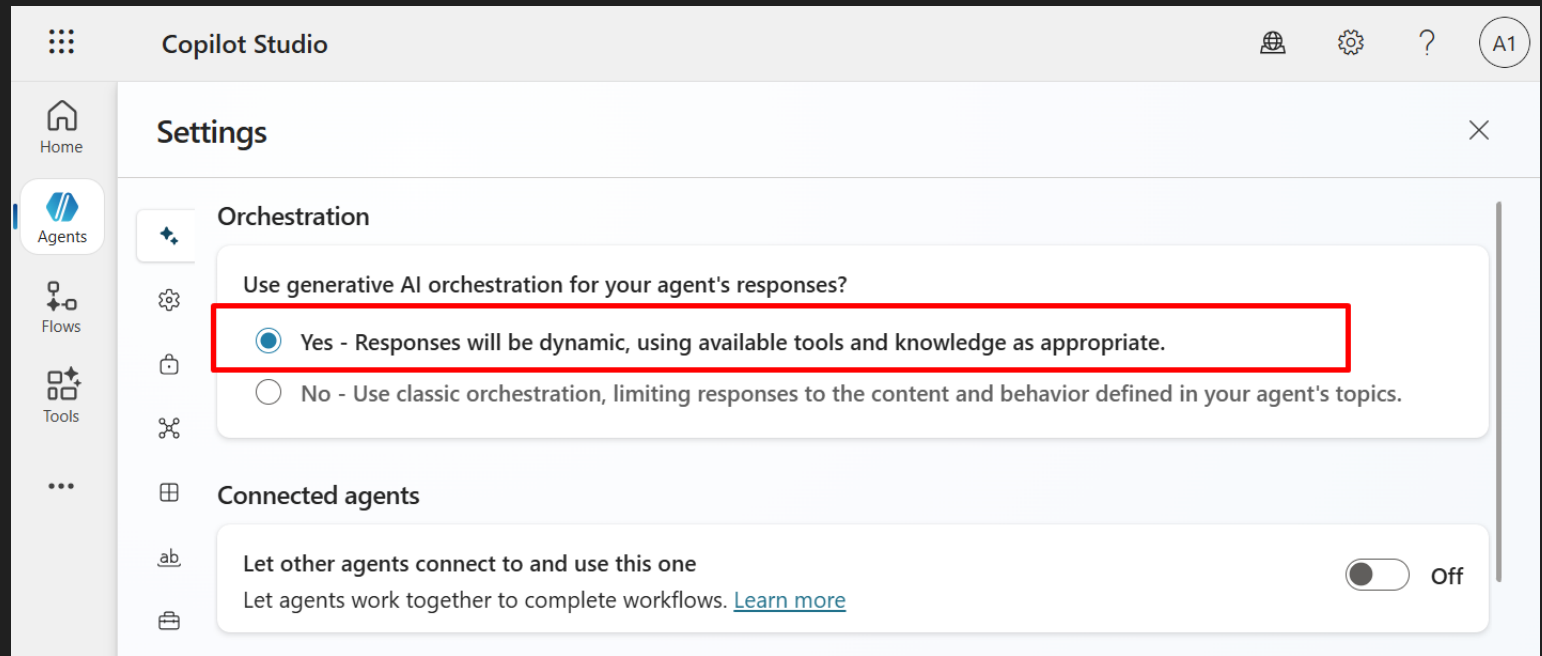

- Open the test pane and have a conversation with your agent

FRAGO: Activity Map

1. Open Agent Settings

Make sure that the option:
“Yes - Responses will be dynamic, using available tools and knowledge as appropriate.” is selected

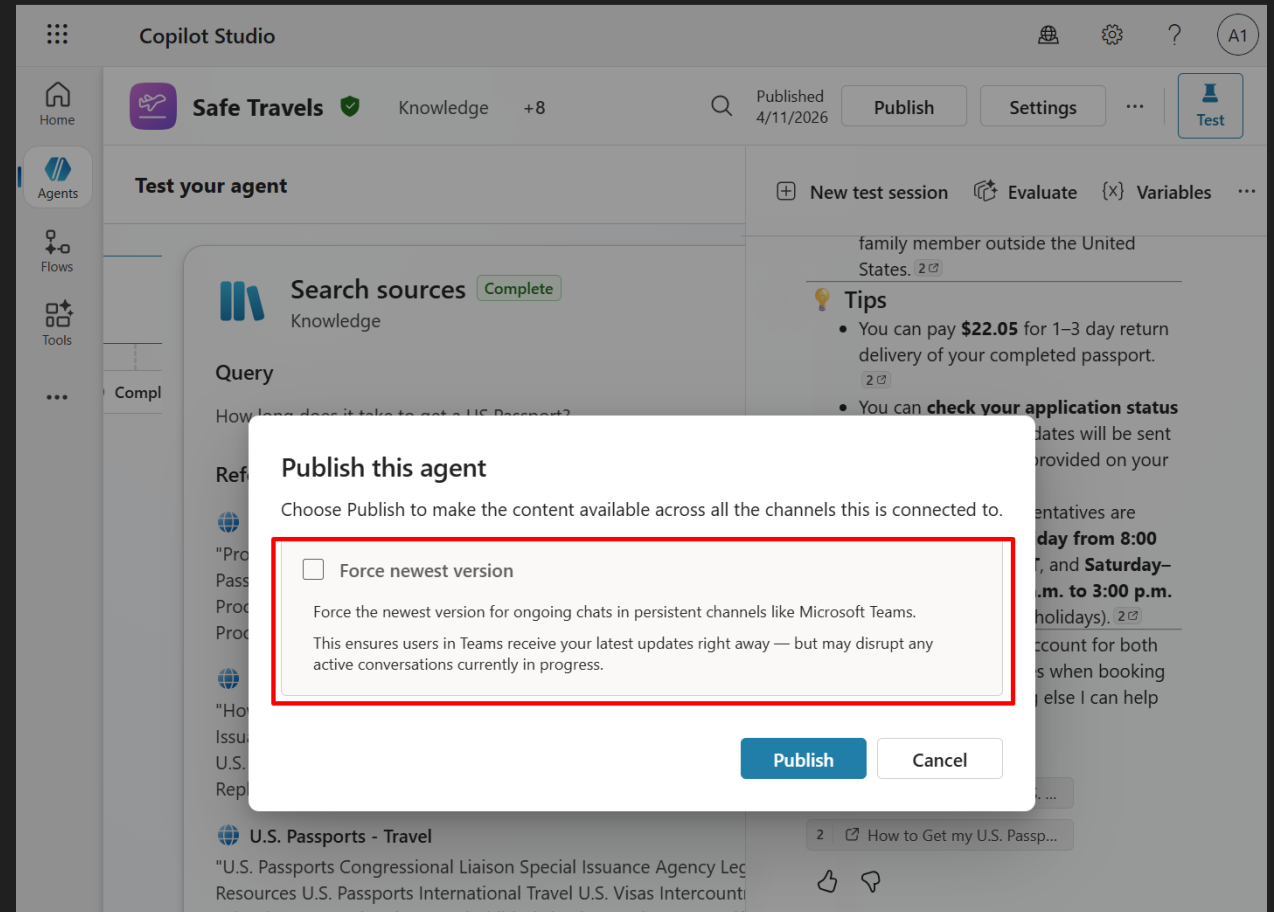

2. Save

FARGO: Force Newest Version

This is a new feature that was added lately.

Simply ignore it for this lab.

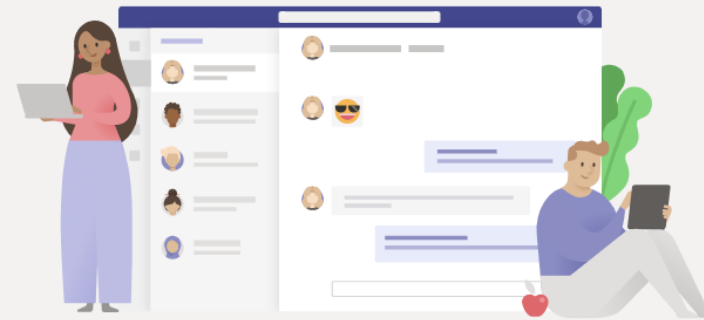

NOTE: Open Teams Webapp

If you see this message –
just choose

«Open Teams in the
Browser»

If teams desktop app opens
on your computer, simply
close it.

Stay better connected with the Teams desktop app

Download the Windows app

Use the web app instead

Already have the Teams app? [Launch it now](#)

Let's go!

Mission 05: Using a Pre-Built Agent

 CODENAME	OPERATION SAFE TRAVELS
 DIFFICULTY	★ ★ ★
 TIME	30 min
 PRODUCTS	Microsoft Copilot Studio Microsoft 365 Microsoft Teams
 TAGS	Prebuilt Agents
 INDUSTRIES	IT

 [Mission 03: Deploy a Declarative Agent for Microsoft 365 Copilot | Agent Academy](#)

Mission Debrief #1

Q1: What are the three building blocks in Copilot Studio?

Q2: Declarative vs. autonomous — what's the difference?

Q3: What did you customize in your prebuilt agent?

Pair up: show your neighbour your agent!

Mission #2: Build

Creating & Packaging Agents

Lesson 03: Create a Declarative Agent

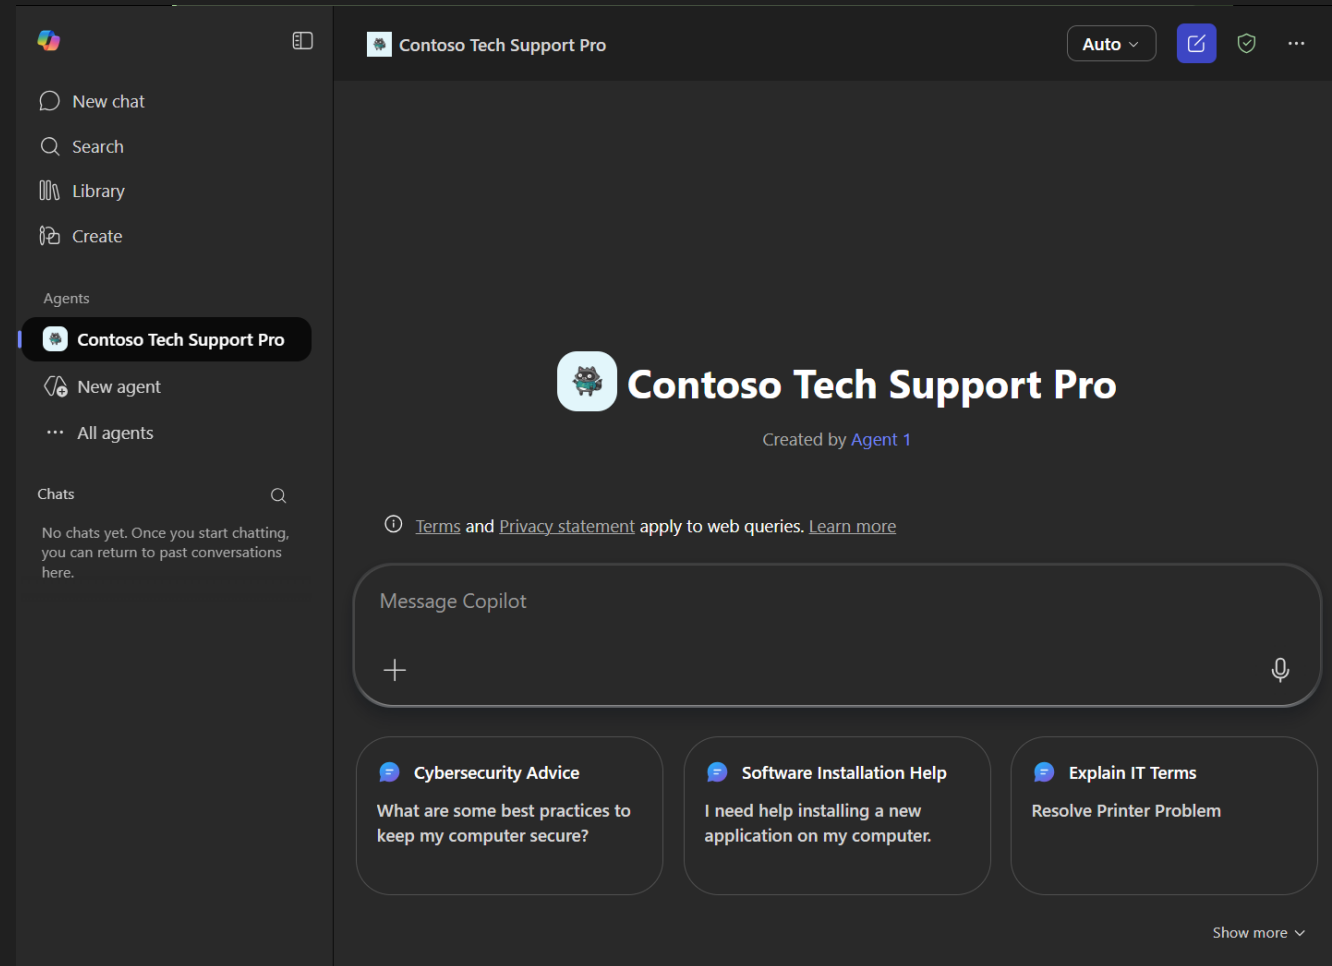

- **Build an agent grounded in a prompt**
- You write the system prompt — the agent's personality & purpose
- Connect it to Microsoft 365 Copilot
- Key skill: prompt engineering for agents

Lesson 03: Step by Step

- **1. Create a new agent in Copilot Studio**
 - Start from blank and name your agent
- **2. Write the system prompt**
 - Define what the agent does, its tone, and boundaries
- **3. Add to Microsoft 365 Copilot**
 - Configure the declarative agent manifest
- **4. Test in Copilot**
 - Verify your agent responds correctly within M365 Copilot

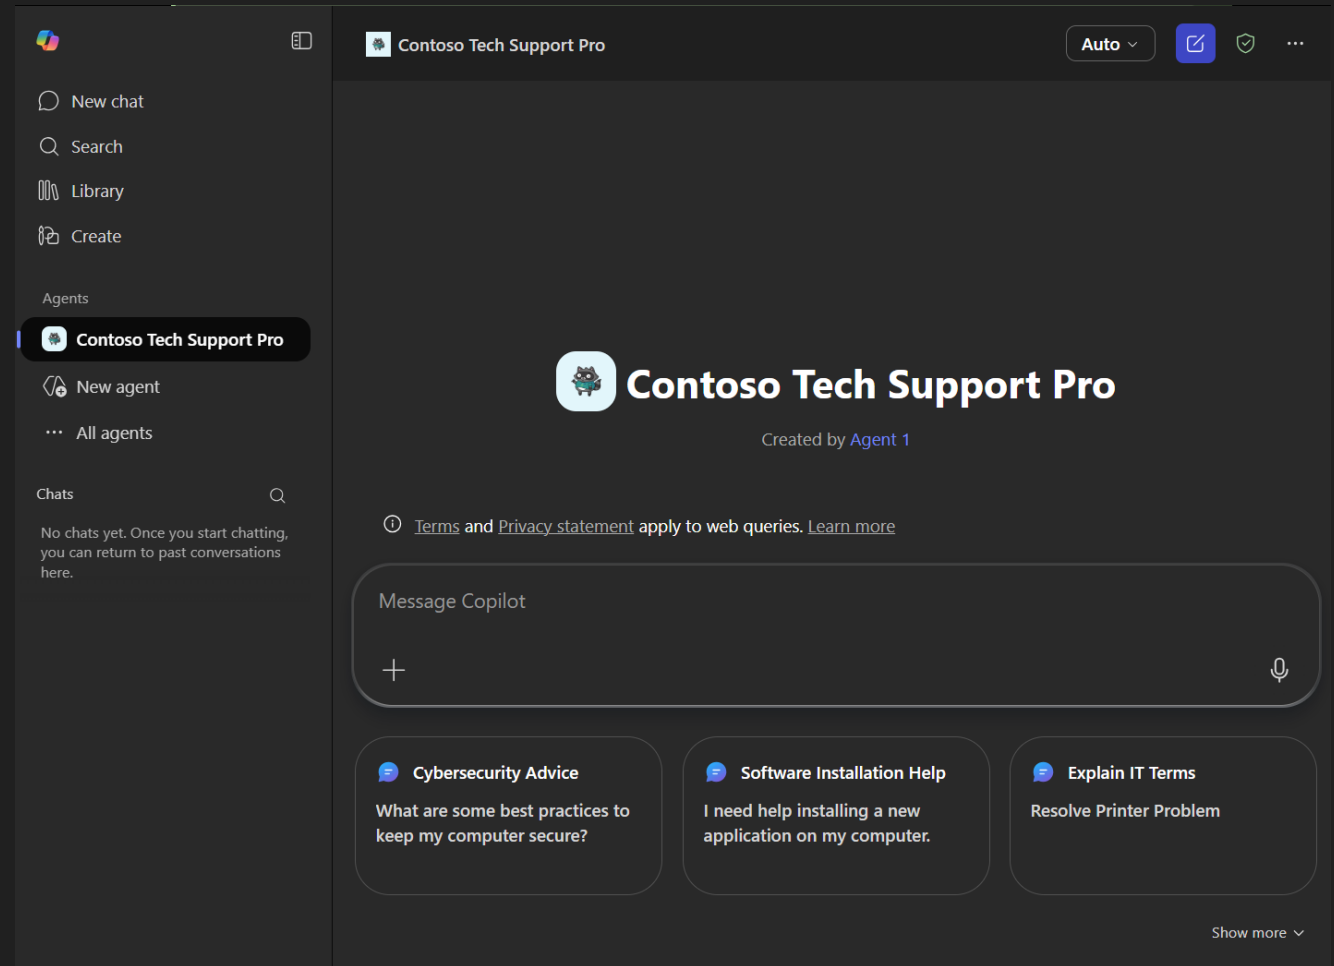

FRAGO: Publish to Teams fail

If this happens, just close the modal using the “X” in the top right corner

FRAGO: Developer -on

Might not work on the first try

Let's go!

Mission 03: Deploy a Declarative Agent for Microsoft 365 Copilot

 CODENAME	OPERATION COPILOT EXTENSION

 TIME	60 min
 PRODUCTS	Microsoft Copilot Studio Microsoft 365 Microsoft Teams
 TAGS	Declarative Agents
 INDUSTRIES	IT

 Mission 03: Deploy a Declarative Agent for Microsoft 365 Copilot | Agent Academy

Lesson 04: Creating a Solution

- **Why solutions matter**
- Solutions package your agent for reuse and deployment
- Move agents between environments (dev → test → production)
- Manage dependencies and version control
- *Think of it as the shipping container for your agent*

Lesson 04: Step by Step

- **1. Create a new solution**
 - Open the Power Apps maker portal and create a solution
- **2. Add your agent to the solution**
 - Include the agent and all its dependencies
- **3. Review components**
 - Understand what gets packaged: agent, topics, connections
- **4. Export (optional)**
 - Export the solution as managed or unmanaged

Let's go!

 [Mission 04: Creating a Solution for Your Agent | Agent Academy](#)

Lesson 06: Create Agent From Conversation

- **Ground your agent in knowledge sources**
- Connect SharePoint, files, or websites as knowledge
- The agent uses RAG to retrieve and generate answers
- This is where agents get smart

FRAGO: Agent Model

Make sure to set the agent model to GPT-4.1

Lesson 06: Step by Step

- **1. Create a new agent from conversation**
 - Describe what you want the agent to do in natural language
- **2. Add knowledge sources**
 - Connect your SharePoint site as the agent's knowledge base
- **3. Test with real questions**
 - Ask questions only answerable from your connected data
- **4. Refine**
 - Adjust instructions and knowledge scope based on test results

Let's go!

🚨 Mission 06: Create a custom agent using natural language with AI and grounding it with your data

🏢 INDUSTRIES **IT**

🚨 Mission 06: Create a custom agent using natural language with AI and grounding it with your data | Agent Academy

Mission Debrief #2

Q1: What is the role of a system prompt in a declarative agent?

Q2: Why package an agent into a solution?

Q3: How does knowledge grounding change agent answers?

Mission #3: Enhance

Topics, Cards & Flows

Lesson 07: Add Topics With Triggers

- **Define custom question-and-answer paths**
- Topics let you control exactly how the agent responds
- Triggers detect when a user asks about a subject
- When AI alone isn't enough, Topics give you precision

Lesson 07: Step by Step

- **1. Create a new Topic**
 - Define trigger phrases that activate this topic
- **2. Build the conversation flow**
 - Add message nodes, questions, and conditions
- **3. Add branching logic**
 - Route the conversation based on user responses
- **4. Test your topic**
 - Trigger the topic and walk through the full conversation path

Let's go!

Mission 07: Add new topic with trigger and nodes

 CODENAME	OPERATION STAY ON TOPIC
 DIFFICULTY	★ ★ ★
 TIME	60 min
 PRODUCTS	Microsoft Copilot Studio SharePoint

 INDUSTRIES	IT

 Mission 07: Add new topic with trigger and nodes | Agent Academy

Lesson 08: Add Adaptive Cards

- **Rich, interactive UI inside your agent**
- Adaptive Cards display forms, buttons, and data inside the chat
- Use Power Fx to bind card data to SharePoint lists
- Collect structured input from users (not just free text)
- *This is where your agent starts looking professional*

Lesson 08: Step by Step

- **1. Design your Adaptive Card**
 - Use the Adaptive Card Designer or build in Copilot Studio
- **2. Bind to SharePoint data**
 - Use Power Fx to pull data from your SharePoint lists into the card
- **3. Add the card to your topic**
 - Insert the card as a message node in your conversation flow
- **4. Handle user input**
 - Capture what the user submits through the card

Let's go!

Mission 08: Enhance user interactions in Topics with Adaptive Cards

 CODENAME **OPERATION INTERFACE UPLIFT**

 INDUSTRIES **IT**

 Mission 08: Enhance user interactions in Topics with Adaptive Cards | Agent Academy

Lesson 09: Add An Agent Flow

- **Connect your agent to back-end automation**
- Agent Flows trigger Power Automate from conversation
- Pass Adaptive Card input to a flow for processing
- Your agent can now do things, not just talk

Lesson 09: Step by Step

- **1. Create an Agent Flow**

- Build a new flow triggered by your agent's topic

- **2. Map input from the Adaptive Card**

- Pass the card submission data into the flow as parameters

- **3. Add flow actions**

- Create items in SharePoint, send notifications, or call connectors

- **4. Test end-to-end**

- Chat → Card → Submit → Flow → Result. The full loop.

Let's go!

Mission 09: Add an agent flow to your Topic for automation

 Mission 09: Add an agent flow to your Topic for automation | Agent Academy

Mission Debrief #3

Q1: What is a Topic trigger, and when would you use one?

Q2: How do Adaptive Cards improve the user experience?

Q3: What connects a card submission to a back-end action?

Mission #4: Deploy

Events, Publishing & Going Rogue

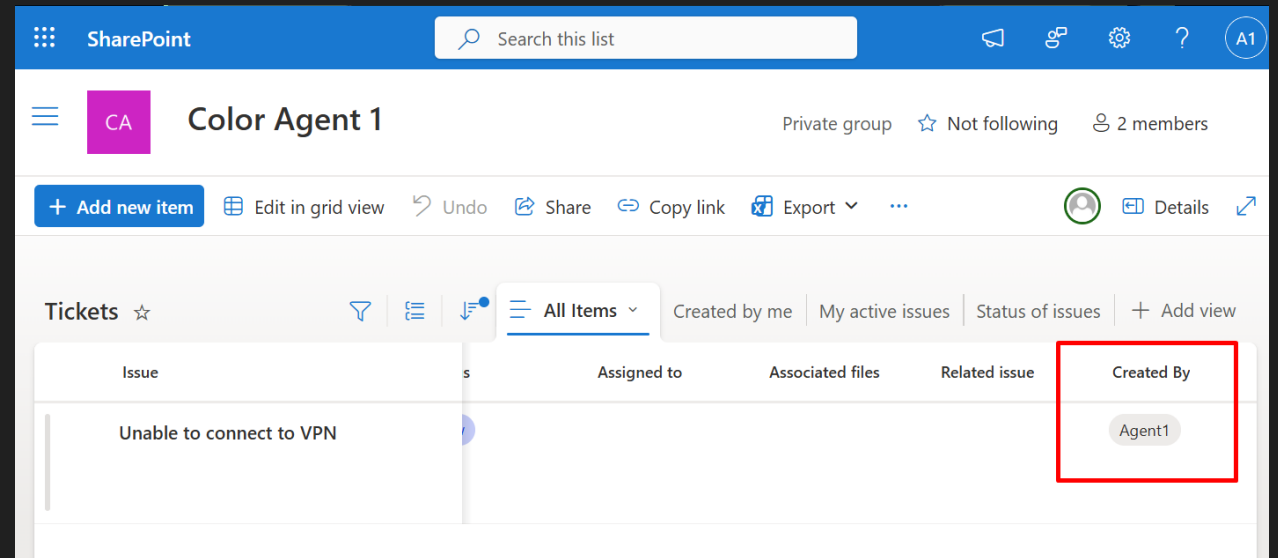

Lesson 10: Add Event Triggers

- **Make your agent act on its own**
- Event triggers respond to things that happen, not just questions
- A new SharePoint item, a schedule, an external event
- The agent doesn't wait to be asked — it acts

FRAGO: Author/Created by column

When you test your trigger, the flow will fail due to the “Author/Display Name” not being available on the sharepoint list view.

Fix: Show the “Created by” column in the All Items list view

Lesson 10: Step by Step

- **1. Add an event trigger to your agent**
 - Select the event type: data change, schedule, or external signal
- **2. Define the trigger condition**
 - Specify when the agent should activate
- **3. Build the autonomous action**
 - What should the agent do when the event fires?
- **4. Test the trigger**
 - Simulate the event and verify the agent responds correctly

Let's go!

Mission 10: Add Event Triggers - Enable autonomous agent capabilities

IT

 Mission 10: Add Event Triggers - Enable autonomous agent capabilities | Agent Academy

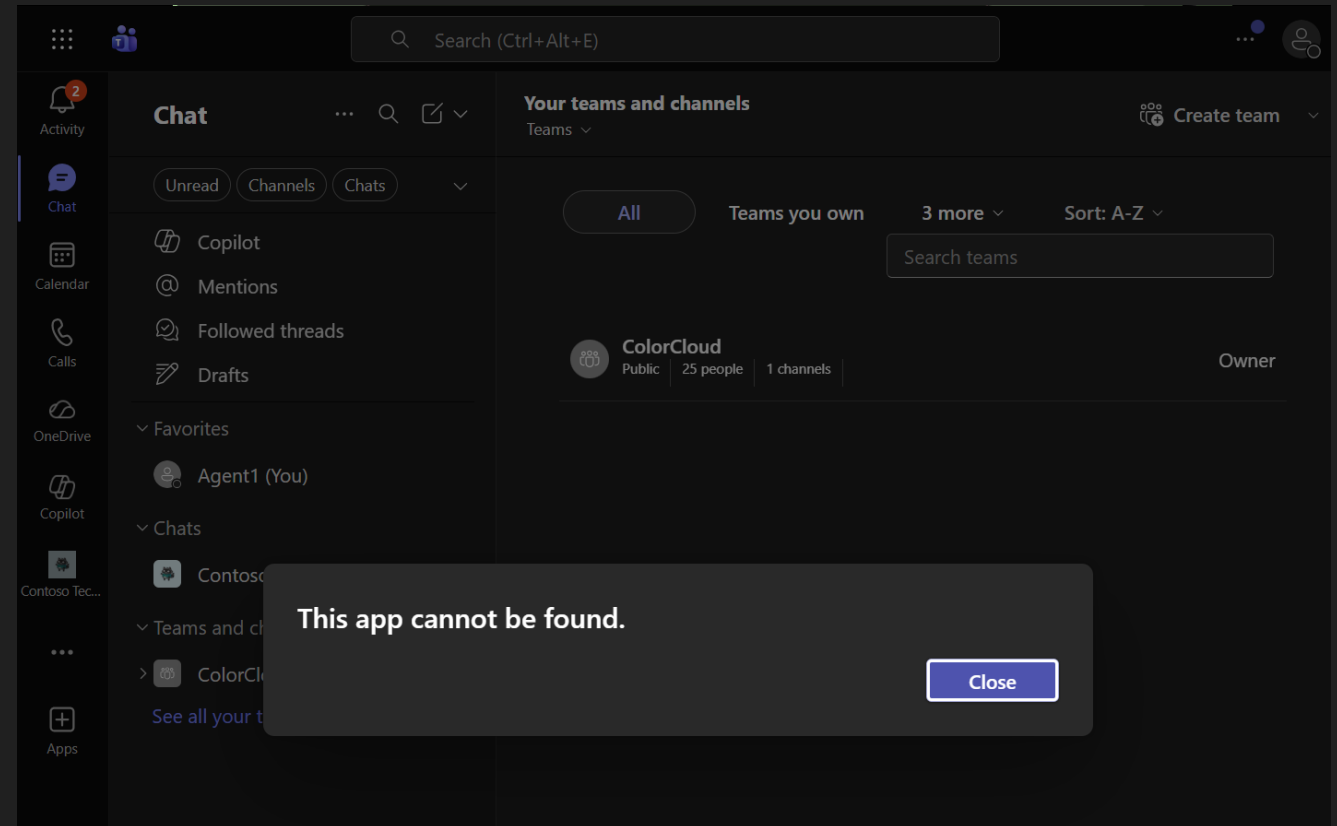

Lesson 11: Publish Your Agent

- **Ship it. Deploy to where your users are.**
- Publish to Microsoft Teams — available in the Teams app store
- Publish to Microsoft 365 Copilot — integrated into the Copilot experience
- Configure authentication and access controls
- *Your agent goes from prototype to production*

FRAGO: App cannot be found

When publishing to teams, you might get the “This app cannot be found”

Click the “Close” button and give Teams a minute (time for a break?) and try publishing your agent again.

Lesson 11: Step by Step

- **1. Publish your agent**

- Click Publish in Copilot Studio to create a live version

- **2. Deploy to Microsoft Teams**

- Configure the Teams channel and make the agent available

- **3. Deploy to Microsoft 365 Copilot**

- Add the agent as a Copilot extension

- **4. Verify deployment**

- Open Teams and M365 Copilot and test your live agent

Let's go!
