

EPPC – Audio-Visual (AV) Guidelines for Speakers

Please review the following AV guidelines to ensure a smooth setup and successful presentation.

Arrival

Speakers are requested to arrive in the room **15 minutes prior** to their session. This time is reserved for technical setup and final checks with the AV technician. Speakers are kindly asked to be mindful of their session end time to ensure the following speaker has sufficient time to setup.

On tutorial day, speakers are welcome and encouraged to arrive **up to 1 hour before** their session begins.

Connectivity & Equipment

An HDMI cable will be provided for video connection, along with a 3.5mm (mini-jack) audio connection.

If your device does not support HDMI, please bring your own appropriate adapter. A limited number of adapters will be available on-site if required, subject to availability.

Technical Assistance

An AV technician will be present in the room upon your arrival and will be available to assist with setup, testing, or any audio-visual questions.

On tutorial day, technicians will be roving between the different rooms. We kindly ask for your patience while they attend to each session.

Presentation Setup

Each room is equipped with a lectern, including a built-in microphone. You may place your laptop on the lectern during your presentation.
